A team of instructional support professionals and paraprofessionals assist students who require additional support to satisfy the curriculum requirements. BCTC staff also teach and reinforce academic content within the technical curriculum.

A Learning Resource Center (LRC) is provided for students to work in small learning groups and to utilize computer-assisted instruction. The goal of instructional support is to assist students to be successful in their career and technical program.

### Skill Alignment Charts

The Skill Alignment Charts are intended to be used as a tool to assist in determining appropriate student placement, for identifying gaps related to a student's readiness for a career and technical education program and for determining the special services that will be required to address those gaps and ensure a student's success.
