

NOCTI

Digital Study Guides: A Powerful Resource

Roadmap for Credential Preparation!

NOCTI Digital Study Guides are available 24/7 on all devices and are helpful in providing a road map for credential preparation. Utilize these tools to monitor student progress and to keep CTE students engaged! The checklists and breakdowns for the knowledge and skill-based components offer powerful tools to gauge student learning.

Teachers can incorporate Study Guides as part of the classroom instruction by dividing students into groups to dig deeper into topics represented on the credential, facilitating discussions about how targeted skills are important in the occupation, completing a self-analysis of the knowledge and skills represented, and incorporating the Study Guide content as part of homework assignments.

Study Guides are typically ordered through a testing site but can be ordered directly from NOCTI as needed. Give our customer care team a call to determine the best option for credential preparation!
